Methods present

WILDERNESS EMS & TRAUMA BASICS

August 29th 2025
0800-1600

IFAK & Trauma Basics

Treating traumatic emergencies in dynamic settings and blood transfusion basics

Wilderness EMS Basics

Assessment and management of emergencies in remote and austere settings. Improvised techniques and patient movement.

Advanced Airway Management

Airway anatomy and physiology. Recognition of respiratory distress. Special considerations for airway management in prolonged field care.

Structured Skills Labs

Including airway, IV, and Wilderness EMS techniques

Enhance Your EMS Skills

Join us to refresh your life-saving abilities in trauma care, airway management, and more!

Our training encompasses essential skills, complemented by hands-on practice in structured skills labs.

Plus, we will be raffling off an RTIC cooler valued at \$100!

Seats are limited.

Please register by August 15th
