

CHNA IMPLEMENTATION PLAN

2024-2026

- **Support, advocate and lead efforts to realize a healthy, diverse, inclusive, and welcoming community that offers all residents access to quality health care and that attracts families and workforce because of its affordability and livability. (*Health Equity consideration*).**
 - Explore ways to support the City of Willcox and other players in economic development efforts;
 - NCCH applied for economic development grant (will know results summer 2024);
 - Explore how Southeast Az Economic Development Group might be of assistance;

- **Provide services and support for health aging in place for our rapidly growing senior residents.**
- ***Health Equity Consideration*, given the higher utilization of healthcare in this population and the steerage away from traditional provision of care models in distant rural locations.**
 - Explore provision of in person and/or telehealth specialty appointments for area residents with TMC One;
 - Work with SEAGO and AAA to understand programming and assist in “getting out the word”.

- **Partner, advocate, educate and directly provide services to address the community’s growing behavioral health needs.**
 - Improve uptake of Concert health within NCCH Clinics;
 - Continue growth of outpatient geri-psych program;
 - Gain understanding of what services area organizations provide;

- **Improve access to primary care and dental services.**
- **Fourth NP was recruited late 2023 for RHCs;**
 - Continue Physician Recruitment initiative;
 - Encourage dental opportunities with our federally qualified health center, Chiricahua Community Health Centers.
